THE CANADA YEAR BOOK 1910

The tables of the Canada Year Book 1910 have been prepared, as during the past five years, by Messrs. Joseph Wilkins and James Skead, and the Notes of Events of the Year have been written by Mr. E. H. Godfrey. Twenty-six pages have been added to the statistical tables, chiefly by more complete details of items of imports and exports. Further particulars have been given of blast furnaces, and new tables supply statistics of electric light companies and of divorces. The events of the year deal practically with the same subjects as last year.

ARCHIBALD BLUE,

Chief Officer.

Census and Statistics Office, Ottawa, June 1911.

EVENTS OF THE YEAR

The second session of the eleventh Parliament of the Dominion of Canada, opened on November 11 1909 and closed by Dominion prorogation on May 4 1910, resulted in the passing of 177 acts, Parliament. of which 62 were public and general and 115 private and local. Of principal interest in the former category were the measures which relate to the establishment of the Canadian Naval Service, insurance, the currency, the investigation of detrimental trade combines, immigration and prevention of the importation of destructive insects and pests.

The Insurance act 1910 (chapter 32), which came into force The on May 4, repeals previous insurance legislation and brings Insurance under new regulation all kinds of insurance in Canada.

It will be remembered that six years ago the revelation of certain abuses in connection with the administration of life Royal insurance companies in the United States caused general on Life uneasiness on the part of policy holders and led to the appoint-Insurance. ment on February 28 1906 of a Royal Commission to inquire into the general subject of life insurance in Canada. This Commission presented their report on February 22 1907, together with four volumes of evidence, and the report included a draft bill on life insurance recommended for enactment by Parlia-

In the session of 1907-08 the Government introduced into Insurance Parliament a bill — not restricted to life insurance,— which bills of gave effect to many of the recommendations of the Commission, sessions of It was not, however, passed. In the session of 1909 a modified 1907-08 form of this bill passed the Commons but failed in the Senate, owing to want of time for the due consideration of its provisions.

The measure which has now become law consists of 188 sections and a schedule of seven forms. It is divided into seven parts, viz., Part I. General; Part II. Life Insurance; Part III. Fire Insurance; Part IV. Insurance other than life and fire; Part v. Provisions applicable to companies hereafter incorporated by Parliament; Part vi. Penalties for offences not otherwise provided for; and Part vII. Repeal of previous acts.

It is unnecessary to attempt to explain here in detail all the highly technical provisions of the act. Some of the principal Principal changes in alterations in the law of insurance thereby effected are set out the law of in the Report for 1909 of the Superintendent of Insurance (pp. insurance. xlvii.-li.), and the following may be indicated as among the more

important:

(1). The department charged with the administration of the act, formerly part of the Finance Department, is constituted a separate Department of Insurance under the Minister of Finance, with the Superintendent of Insurance as Deputy Head.

Principal changes in the law of insurance.

(2). As in the past, life insurance business may not be combined with any other branch of insurance, but a larger number of other classes of insurance may be combined in one license than could be so combined under the old act.

(3). Hereafter only trust companies, incorporated by or under an act of the Canadian Parliament, or of a provincial legislature, and approved by the Minister of Finance, may be appointed to act as trustees for insurance companies other than Canadian transacting business in Canada. Individual trustees at present in office will however not be disturbed.

(4). The British Offices Life Tables 1893 O^m (5) have been substituted for the H^m tables of 1872 in the departmental

valuation of life policies.

(5). It is clearly enacted that licenses may be withdrawn or suspended for violations of the act or failure to comply

with its provisions.

(6). No commission may be paid to or accepted by agents unless the amount has been determined beforehand, and only agents may be paid by commission, except in case of business personally solicited by employees other than directors, trustees or officers of the company outside of office hours.

or officers of the company outside of office hours

(7). No salary may be paid to the officer of a life company unless authorised by a vote of the directors, and no salary or compensation amounting to more than \$5,000 a year may be paid to any agent, unless under contract approved by the directors. Salary agreements may not be made in respect of any longer period than five years.

(8). Estimates as to dividends or shares of surplus expected

to be paid on life policies are forbidden.

(9). An agent of a life company is not to be regarded as

the agent of the insured.

(10). In the case of deferred dividend policies issued after January 1 1911 the surplus must be ascertained and apportioned quinquennially, and be carried in the accounts as a liability until it has actually been distributed. In the case of such policies issued prior to that date, the surplus must be ascertained at least quinquennially and contingently apportioned but need not be carried as a liability.

(11). The practice of rebating or of dividing commission with the insured as an inducement to insure is prohibited, and penalties are prescribed for violations of the act in this

respect.

(12.) Subject to conditions laid down, property in Canada may be insured against fire in unlicensed British or foreign companies, but persons so insured are bound under penalty for default to make annual returns to the Superintendent of Insurance, for which purpose blank forms are supplied by him.

The Currency act 1910 (chapter 14) repeals the previous act, R.S. 1906 c. 25, but re-enacts most of its provisions. Its main

The Currency act 1910.

object is to enable the Government to provide a gold currency The Currency for Canada in denominations of \$20, \$10, \$5 and \$2.50 gold Act 1910. pieces. The British sovereign continues to be legal tender at the value in Canadian currency of \$4.863; but in fixing the standard for the new Canadian gold pieces these are made to correspond exactly in intrinsic value with the gold coinage of the United States. Provision is also made in the act for the coinage of a silver dollar. It is further provided that the Governor in Council shall appoint not less than three assay commissioners to examine and test under regulations to be made for the purpose the fineness and weight of the coins turned out by the Ottawa Branch of the Royal Mint.

The Combines Investigation act (chapter 9), providing for the investigation of combines, monopolies, trusts and mergers, Combines is modelled in principle upon the Industrial Disputes Investigation act. tion act 1907 and similarly will be administered by the Department of Labour. A somewhat lengthy legal definition is applied to the term "combine", but shortly it means any contract, agreement, arrangement or combination which has the effect of increasing or fixing the price of any article of trade or commerce to the detriment of consumers or producers. The act consists of 48 sections and a schedule of two forms, and it prescribes in considerable detail the exact procedure to be followed in the investigation of an alleged combine.

Where six or more British subjects resident in Canada are of opinion that a combine exists such as is defined in the act they Appointment are empowered to apply to a judge for an order directing an of Boards of investigation. investigation. If satisfied, after hearing the parties on both sides, that an injurious combine exists the judge shall direct an investigation and send an order to that effect, accompanied by the evidence, to the Registrar of Boards of Investigation, an officer appointed under the act. The Minister of Labour is then required to proceed forthwith to appoint a Board of Investigation consisting of three members, one on the recommendation of the six or more declarants, one on the recommendation of the persons concerned in the alleged combine and the third—a judge to act as chairman—on the recommendation of the other two members.

Provision is made for the giving of immediate publicity to the findings of the Board, for the reduction of customs duties upon resulting articles proved to be the subject of combines and for the revoca- from tion of patents where such have been used in the unreasonable investigation. enhancement of prices or restraint of trade.

Any person reported by the Board as continuing to offend against the act is rendered liable to a daily penalty not exceed-Penalty ing \$1,000 and costs.

for individual

Chapter 27, a new Immigration act, repeals previous legislation as passed in 1906, R.S. 1906 c. 93, in 1907 c. 19 and in New Immi-1908 c. 33. While re-enacting the main provisions of these gration act.

measures the new act includes also others designed still further to strengthen the laws against the admission into Canada of undesirable persons.

Definitions extended.

The interpretation in section 2 is considerably extended, and precise definitions are applied to the terms 'officer', 'domicile', 'Canadian citizen', 'immigrant', 'passenger', 'stowaway', 'rejected', 'deportation', etc.

Immigration by land.

Special provisions as to passengers by land empower the Governor in Council to make regulations imposing upon transportation companies obligations similar to those applicable to masters and owners of vessels bringing immigrants by sea.

Boards of Inquiry.

Under sections 13-24 the Minister of the Interior is authorised to appoint at any port of entry a Board of Inquiry consisting of three or more officers (of whom the immigration officer in charge shall be one) with authority to determine whether immigrants shall be allowed to enter or remain in Canada or shall be rejected or deported. The procedure before such Board is regulated; and, except in the case of persons afflicted with loathsome or dangerous diseases or that are mentally unsound, appeals from its decisions may, under specified conditions, be made to the Minister of the Interior.

Deportation of criminals, anarchists, etc.

The law governing the deportation of undesirable immigrants is strengthened in several directions. Thus the period within which criminal immigrants become liable to deportation is increased from two to three years, and a comprehensive clause is aimed at the deportation of anarchists and others who advo cate the employment of force or violence against constituted law and authority. New procedure in both these cases is laid down by which written complaints addressed to the Minister of the Interior or the Superintendent of Immigration are investi gated by a Board of Inquiry as constituted under sections 13 24. Upon their substantiation persons belonging to the prohib ited or undesirable classes mentioned in the act shall be forth with deported, subject however to the same right of appeal to the Minister of the Interior as in the case of persons seeking to enter Canada. Persons ordered to be deported, who claim to be Canadian citizens or to have acquired Canadian domicile have the right to consult counsel and to appeal to the court against deportation. In other cases the decision of the Minister of the Interior is final.

Special permits to enter Canada.

Under section 4 of the act the Minister of the Interior majesue a written permit in the form prescribed authorising any person to enter Canada without being subject to the provision of the act, the permit to be in force for a specified period only and it may be at any time extended or cancelled by the Minister

Destructive insects and pests.

Chapter 31, passed on May 4, empowers the Governor in Council to make regulations preventing the importation into Canada or the spreading therein of any insect, pest or diseas destructive to vegetation; it defines generally the scope of such

regulations including provision for compensation to the extent of not more than two-thirds of the value for crops, trees, Destructive bushes or other vegetation, etc., destroyed. The Minister of insects and Agriculture is authorised to appoint inspectors with powers of entry. Regulations under the act were passed on May 11 and amended on July 27. They prescribe the ports at which nursery stock must enter Canada and be fumigated and specify the insects, pests and diseases to which the act shall apply. The importation into Canada of potatoes from Newfoundland and the islands of St. Pierre and Miquelon is prohibited. The San José Scale act of 1898, R. S. 1906 c. 127, and the regulations thereunder, are repealed, this insect being brought within the operation of the new act. Contravention of the act or of the regulations made thereunder is punishable, upon summary conviction, by a fine not exceeding \$100 or by imprisonment not exceeding six months or by both fine and imprisonment.

By chapter 7 sums not exceeding \$12,000 for the 12 months ending June 30 1911 and of less amounts yearly until 1915, Telegraphic when the amount must not exceed \$5,000, are granted to assist in Great Britain. maintaining an independent and efficient service of telegraphic news from Great Britain for publication in the Canadian press. These grants are in continuation of the sums authorised for the years 1908-09 to 1909-10 by the act of 1908 (7-8 Edw. VII, c. 12), and are subject to similar conditions as noted on page xix of the Canada Year Book for 1908.

The Escheats act (chapter 13) provides that where escheats fall to the king in his right of Canada the Governor in Council The may make grants of the property escheated (a) to any person Escheats who in the opinion of the Governor in Council had a legal or act. moral claim upon the previous owner, or a just or natural right or claim to succeed to his property or to any part thereof; (b) to carry into effect any disposition thereof which the Governor in Council believes the previous owner may have intended; (c) to reward any person making discovery of such property to His Majesty.

Under chapter 37 a sum of \$50,000 payable in lead bounties is diverted to experiments in zinc production. The act pro-Grant to aid vides for the reduction of the maximum amount payable in of Canadian bounties on lead mined in Canada from \$2,500,000, as in sec-zinc. tion 1 (2) of chapter 43 of the statutes of 1908, to \$2,450,000, and authorises the Governor in Council to expend a sum not exceeding \$50,000 for investigating the processes used in the production of zinc, for making experiments and for any other purpose that may be deemed advisable for the promotion of the production and manufacture in Canada of zinc and zinc products from Canadian ores.

The Judicature.

Chapter 25 amends the Judges act, R. S. 1906 c. 138, by increasing the number of puisne judges of the superior court of the province of Quebec from 17 to 21 and also amends chapter 25 section 1 of the statutes of 1907 by providing for four instead of three puisne judges of the Manitoba court of king's bench.

Chapter 6 is an act to incorporate the Canadian Northern Railway acts. Alberta Railway Company and to aid in the construction of its railway. Chapter 24 amends the Government Railways act as to the liability of His Majesty for damages caused by fire from locomotives. Chapter 25 authorises the Government of Canada to acquire by lease lines of railway connecting with the government railways. Chapter 26 provides for the adjudication of small claims arising out of the operation of the government railways. The Railway act is amended by chapters 50 and 57, and chapter 51 authorises the granting of subsidies in aid of the construction of the lines of railway therein mentioned.

enactments. The criminal code.

Criminal drivers of motor cars.

The French Commercial Treaty.

Abolition of bounties on rolled, round wire rods. Montreal Harbour Commission.

Commission of

Amongst the remaining public acts the following may be Miscellaneous mentioned. The criminal code is amended in respect of betting, pool-selling and book-making (chapter 10), thefts of motor cars (chapter 11) and the unlawful possession of rock, ore or quartz containing gold or silver (chapter 12). By chapter 13 drivers of automobiles or motor vehicles are brought within the operation of the criminal code when guilty of causing injury by furious driving or other wilful misconduct and are also rendered liable to fine or imprisonment for failure to stop after the occurrence of an accident. The Supplementary French Convention act 1909 (chapter 21), assented to on December 3, gives the legal approval of the Parliament of Canada to the supplementary convention signed at Paris on January 23 1909 prior to ratification of the commercial treaty with France (see Year Book of 1909, p. xxvii). Chapter 33 abolishes the payment after June 30 1911 of bounties on rolled, round wire rods under section 1 (1d) of chapter 24 of the statutes of 1907. Chapter 40 provides for further advances to the Harbour Commissioners of Montreal. Chapter 42 provides that the act respecting the Commission for the Conservation of Natural Resources may be cited as the Conservation act. It amends also the original act of 1909 in matters relating to procedure, and new sections are added which forbid, under penalties, any employee of the Commission Conservation, to acquire an interest in mines, lands, timber limits, etc., or to disclose any discovery made by him or information in his possession to any persons except members of the Commission until such discovery or information has been reported to Parliament. By chapter 45 an additional sum of \$40,000 is payable annually by the Dominion Government to the Ottawa Improvement Commission for a period of ten years from July 1 1909. and also during the same period a sum of \$15,000 is payable annually to the corporation of Ottawa as a contribution

Ottawa Improvement Commission.

to the city fire protection service. Chapter 46 provides that Ottawa fire the bounties on petroleum shall in future be divided amongst protection service. the producers and the owners or occupiers of the soil or such other persons interested or injuriously affected by the mining Petroleum operations as the Governor in Council by regulation approves. bounties. Chapter 48 amends the Prisons and Reformatories act by providing for the committal to a reformatory or industrial home of women and young persons under 16 in accordance with Reformatories certain conditions specified in the act. Chapter 57 is an act homes. to control the rates and facilities of ocean cable companies and to amend the Railway act with respect to telegraphs and Ocean cable companies. telephones. Chapter 59, the Milk Test act, provides for the testing and marking of glass ware used for milk tests. Chapter Milk Testact. 61 regulates the water carriage of goods; it applies to ships carrying goods from any port in Canada to any other port in Water car-Canada or from any port in Canada to any port outside of riage of Canada.

Amendments are also made in the following acts: Government Annuities (chapters 4 and 5), Civil Service (chapter 8), Amendment Customs and Fisheries Protection, R.S. 1906 c. 47 (chapter 15), of various acts. Fisheries (chapter 20), Gas Inspection (chapter 23), Indian (chapter 28), Industrial Disputes Investigation (chapter 29), Inland Revenue (chapter 30), Irrigation (chapter 34), Land Titles (chapter 36), Meat and Canned Foods (chapter 38), Militia Pension (chapter 39), National Battlefields at Quebec (chapter 41), Navigable Waters Protection (chapter 44), Seed Control (chapter 54), Telegraph (chapters 55 and 56), Canada Temperance (chapter 58), Volunteer Bounty (chapter 60), Wind. ing up (chapter 62).

In January serious distress was caused in France by floods, especially in Paris by the overflowing of the river Seine. The Floods in Dominion Parliament appropriated therefore a sum of \$50,000 France. in aid of the sufferers and as a practical expression of the sympathy of the people of Canada. In acknowledging this contribution Sir Francis Bertie, the British Ambassador, in a telegram from Paris on February 10, stated that the French Minister for Foreign Affairs requested that the "deep gratitude of the Government of the Republic, who were much touched at this generous mark of sympathy, might be conveyed to the Canadian Parliament."

The death on May 6, after only brief illness, of King Edward VII plunged the whole of the British Empire into the deepest Death of King grief. Owing to the late King's lofty character and the extra-Elward vii. ordinary personal influence which he had wielded this grief was sincerely shared by all the nations of the world, who took every means of testifying their respect for his memory.

Message of condolence sent by Canada.

On May 7 the Governor General of Canada cabled the following message of condolence to the Secretary of State for the Colonies:

The announcement of the death of King Edward VII, which has just reached Canada, has created universal sorrow. His Majesty's Canadian Ministers desire that you will convey to His Majesty King George and the members of the Royal Family an assurance that the people of Canada share in the great grief that has visited them. In the discharge of the duties of his exalted station his late Majesty not only won the respect and devotion of all British subjects, but by his efforts in behalf of international harmony and good will he became universally esteemed as the Great Peacemaker. Nowhere was this gracious attribute of the Royal character more deeply appreciated than in His Majesty's Dominion of Canada.

Funeral at Windsor.

Edward VII.

At the impressive funeral ceremonies which culminated in the interment at Windsor on May 20 practically every country in the world was represented. The representatives of Canada were the Right Hon. Sir Charles Fitzpatrick, K.C.M.G., Chief Justice of Canada, the Hon. Sydney Fisher, Minister of Agriculture, the Hon. A. B. Aylesworth, K.C., Minister of Justice and Lord Stratheona and Mount Royal, G.C.M.G., High Commissioner for Canada in London. In all the Dominions of the Empire the day of the funeral was observed as one of general mourning. Throughout Canada the day was marked by cessation from business and pleasure, by solemn memorial services in the churches and by military parades and ceremonies in the chief centres of population.

Known and loved as Prince of Wales for 40 years, during

consummate tact and invariable good humour, King Edward, upon his accession, proved what had hardly been realised by the public, that he possessed the very highest qualifications for his exalted station. And he endeared himself still further to his subjects by the extraordinary versatility and zest which he displayed in connection with all phases of the national life. As head of the army and navy he was naturally alive to the interests of these Services, but the representatives of agriculture, of art, of science, of literature, of music, of the drama and of the learned professions also found in His Majesty an active,

intelligent and enthusiastic patron, while on the lighter side of

Reign of King which long period he filled a peculiarly difficult position with

life he appealed irresistibly to the great majority of his countrymen as a typical English sportsman.

Sympathy with the poor and suffering.

The keen, practical sympathy which King Edward ever evinced with suffering and distress was especially shown by his establishment, on the occasion of Queen Victoria's Diamond Jubilee in 1887, of what is now known as "King Edward's Hospital Fund," and it was also manifested by his personal if less public labours when Prince of Wales as a member of the Royal Commission on the Housing of the Poor. His anxiety that conspicuous merit and courageous conduct displayed by the humbler classes of his subjects should not go unrewarded found expression by his institution of the Imperial Service, Edward and Police Medals

From the broader outlook of the world's stage King Edward's reign of nine brief years will assuredly rank as one of the most "Edward the brilliant in history, illustrious from the victories of peace rather Great Peace-maker." than of war. Wreaths of victorious warfare have indeed encircled the brows of many monarchs, but His late Majesty earned an infinitely more glorious chaplet by his constant and successful efforts in the cause of international peace and amity. By the influence of a magic personality, conjoined with highest station, he succeeded, where ordinary diplomacy might well have failed, in disarming mutual suspicions harboured for centuries by the neighbouring countries of France and England and in paving the way to a cordial understanding and friendship which has already stood the test of time and which bids fair to strengthen with the passing years. This happy international friendship between England and France is especially appreciated in Canada, where British and French are gradually building up within the Empire their common Canadian nationality. The "entente cordiale" with France, dating from 1903, was followed in 1907 by a similar understanding with Russia, and this was also brought about largely with the aid of King Edward's personal influence. Nor was it only with these two Powers that British relations were thus so happily improved. Personal visits exchanged between King Edward and the Rulers of Portugal, Spain, Italy, Germany, Austria-Hungary, Denmark, Norway and Sweden did much to cement old international friendships and to promote peace and goodwill. Amongst the sovereigns whose achievements have earned for them a special distinction no title will shine more brightly in the glorious annals of British history than that of "Edward the Great Peacemaker."

H. R. H. The Prince of Wales succeeded to the throne upon the death of his Father, and on May 9 he was proclaimed King Accession of as George V, with due observance of the stately and ceremonial King George v. formularies of ancient usage. On May 23 the Colonial Secretary cabled a Message from King George addressed "To My People beyond the Seas." The full text of this Message was published at the time in the newspapers and in the Canada Gazette of May 28. The concluding paragraph was as follows:

It will be my earnest endeavour to uphold constitutional government and to safeguard in all their fulness the liberties which are enjoyed throughout my Dominions, and under the good guidance of the Ruler of all men I will maintain on the foundation of freedom, justice and peace the great heritage of the United British Empire.

The careful political training which His Majesty enjoyed under King Edward, his wide personal acquaintance with every part of the British Empire, and above all his known excellence of personal character, have inspired his subjects throughout his Dominions with the highest hopes that he will follow worthily the splendid examples of his immediate predecessors.

Majesty's noble speech to his Privy Council on May 7 and the terms of the gracious Messages addressed to his subjects leave no room to doubt that he will do so.

The date of His Majesty's Coronation has been fixed for June

22 1911.

Death of Professor Goldwin Smith.

Date of

Coronation.

Academic and literary career.

On June 7, at the advanced age of 86, died Professor Goldwin Smith, the learned historian, distinguished philosopher and critical writer on current events.

Goldwin Smith, born on August 13 1823 at Reading, the county town of Berkshire, England, was educated at Eton and at Oxford. He became a Fellow of University College, Oxford, in 1846, and in the same year was called to the bar at Lincoln's Inn. From 1858 to 1868 he was Regius Professor of Modern History at Oxford, and he was tutor to the Prince of Wales, his late Majesty King Edward VII. In 1868 he was appointed to the Chair of English and Constitutional History in the Cornell University, then being formed at Ithaca, N.Y., and in 1871 he settled at Toronto, retaining his connection with Cornell University as a non-resident professor. In 1882 he received the honorary degree of D.C.L. from the University of Oxford, and on different occasions he received honorary degrees from American universities. Author of numerous historical and critical essays, probably his two best remembered works will be the political histories of the United Kingdom and the United States, works which admirably exemplify his remarkable powers of condensation and his picturesque lucidity of style. In philosophy he was pessimistic, and on several great questions he maintained, with characteristic courage, views totally opposed to those of the majority of British statesmen and thinkers.

The public spirit which Mr. Goldwin Smith consistently displayed throughout life shines forth in his will. The residue of his estate, which amounted in total value to \$832,860, he bequeathed, after payment of legacies and bequests valued at \$60,500, to the Cornell University, to be used by the Board of Trustees for the promotion of liberal studies, languages ancient and modern, literature, philosophy, history and political science. In making this bequest the testator wrote: "My desire is to show my attachment to the University in the foundation of which I had the honour of taking part, to pay respect to the memory of Ezra Cornell, and to show my attachment as an Englishman to the union of the two branches of our race on this continent with each other and with their common mother." His library, valued at \$9,300, he bequeathed to the University of Toronto; his pictures, statuary and books on art, valued at \$5,000, to the Toronto Art Museum. His residence, The Grange, Toronto, a fine example of Georgian domestic architecture erected in 1815, has now become the property of the Toronto Art Museum under the will of the late Mrs. Goldwin

Smith who died September 9 1909.

Public bequests.

By agreement between Great Britain and the United States of January 27 1909 it was provided, in conformity with the North Atlangeneral arbitration treaty between the two nations of April Fishedes Arta 1908, that seven questions relating to the fisheries on the bitration North Atlantic Coast and turning upon the construction of Award. article 1 of the treaty between Great Britain and the United States of October 20 1818 should be submitted for decision to

the permanent court of arbitration at The Hague.

The Tribunal of Arbitration, constituted for this purpose in accordance with the convention concluded at the second peace Constitution conference at The Hague of October 18 1907, was composed of Tribunal. five members, viz., Dr. Lammasch, president (Austria-Hungary), Dr. Lohman (Holland), Mr. Justice Gray (United States), Sir Charles Fitzpatrick (Canada) and Dr. Drago (Argentina). The Hon. Allen B. Aylesworth, K.C., Minister of Justice of Canada, and Mr. Chandler P. Anderson acted as agents for the Governments of Great Britain and the United States respectively. On the British side the leading counselincluded Sir William Robson (Attorney General of England), Sir Robert B. Finlay, K.C., Sir James Winter, K.C., and Mr. John S. Ewart, K.C., and on the American side the Hon. Elihu Root, the Hon. George Turner, the Hon. S. J. Elder, and the Hon. Charles B. Warren. Canadian counsel also engaged were Mr. George F. Shepley, K.C., and Mr. W. N. Tilley.

After the interchange of written pleadings and preliminary written arguments by each side the questions were orally argued Award of The before the Tribunal at sittings which occupied 40 days from Hague Tribunal. June 1 to August 12, and after deliberation by the Tribunal the award was delivered on September 7. The following are

the main points decided.

Question 1 was whether Great Britain, Canada or Newfoundland had the right to make reasonable regulations appli-Question 1: cable to the fisheries without the consent and concurrence of right to the United States. The Tribunal held that the right to make regulate the such regulations is inherent to the sovereignty of Great Britain, fisheries. but that such regulations must be made bonâ fide and must not be in violation of the treaty of 1818.

Question 2, whether the United States had the right to employ as members of the fishing crews of their vessels persons Questions 2, not inhabitants of the United States, was answered in the 3 and 4. affirmative, but with the ruling added that non-inhabitants so employed derived no benefit or immunity from the treaty. Upon question 3, whether United States fishing vessels could be required to enter or report at custom houses or to pay light or harbour or other dues or to observe any other similar requirement, condition or exaction, the Tribunal decided that United States fishing vessels should report to the custom houses or customs officials where there is a reasonably convenient opportunity for doing so, but that such vessels should not be subjected to the purely commercial formalities of report, entry and

clearance at a custom house, nor to light, harbour or other dues not imposed upon Newfoundland fishermen. Upon question 4 it was held that the privilege accorded by the treaty to American fishermen to enter certain bays or harbours for shelter, repairs, wood or water could not be made subject to the restriction of payment of light or harbour or other dues or entering or reporting at custom houses but that, to avoid abuse. United States fishermen remaining more than 48 hours in such bays or harbours should be required, if thought necessary by Great Britain or the colonial Government, to report at a custom house or to a customs official where reasonably convenient.

Question 5: measurement as applied to

Question 5 was from where must be measured the "three marine miles of any of the coasts, bays, creeks or harbours of His Britannic Majesty's Dominions in America" within which the United States by the treaty of 1818 renounced liberty to take, bays, creeks United States by the treaty of 1818 renounced fiberty to take, and harbours, dry or cure fish. The decision of the Tribunal was as follows: "In the case of bays the three marine miles are to be measured from a straight line drawn across the body of water at the place where it ceases to have the configuration and characteristics of a bay. At all other places the three marine miles are to be measured following the sinuosities of the coast." Rules and a method of procedure for determining the limits of specified bays were recommended for acceptance by the two countries.

Questions 6 and 7.

Question 6 was whether inhabitants of the United States were entitled to fish in the bays, creeks and harbours of the coasts of Newfoundland and of the Magdalen Islands as well as off the coasts thereof. This was decided in the affirmative. Finally question 7 was whether United States fishing vessels were entitled to the commercial privileges accorded to the United States trading vessels generally and it was decided, so far as the treaty of 1818 is concerned, inhabitants of the United States are entitled to these privileges provided the treaty liberty of fishing and the commercial privileges are not exercised concurrently.

General effect of the award.

To questions 1 and 5, involving in the first case British sovereignty and in the other control over territorial waters, the British, Newfoundland and Canadian authorities attached vital importance; hence it is a matter of no small satisfaction that the decisions of the Tribunal were in respect of these questions so entirely favourable to the British contention. Apart however from the merits of the questions submitted, the award of The Hague Tribunal of September 7 1910 settles a dispute of nearly 100 years' standing, removes a constant source of friction between two great kindred peoples, and establishes another powerful precedent in favour of international arbitration as a means of ensuring peace between the civilised nations of the world.

On March 10 Sir Wilfrid Laurier's motion for the second read-Naval Service ing of the Naval Service Bill passed in the House of Commons act.

by 118 votes to 78 votes. On May 4 the measure became law in the form of an act of 54 sections. Its object is to give effect to the resolution unanimously adopted by the House of Commons on March 29 1909 and to the decisions arrived at as the result of the subsidiary conference on imperial defence held in London

July 28 to August 19 1909.1

In general principle the act follows closely the lines of the Militia act, with this difference that naval service is to be volun-Naval Service tary, whereas under the military law all males between 18 and Department. 60 are liable to military service. It provides for the establishment of a Naval Service Department under the Minister for the time being of the Department of Marine and Fisheries, for the transfer from the Department of Marine and Fisheries of the Wireless Telegraph, Fisheries Protection, Hydrographic and Tidal Survey branches and for the organisation and maintenance of Canadian naval forces. The command in chief of these naval forces is declared to continue in and to be vested in the King and will be exercised and administered by His Majesty or by the Governor General as his representative. Provision is also made for the appointment of a deputy minister of the Naval Service, a director of the Naval Service and a Naval Board to advise the Minister on naval affairs. A Naval Reserve, a Naval Volunteer Force and a Naval College of Canada are also to be established and maintained under the act.

By section 22 the Governor in Council is empowered to place the naval forces on active service at any time when it appears Active service in an emeradvisable so to do by reason of an emergency, the terms "active gency." service" and "emergency" being defined by the act to mean in the one case "service or duty during an emergency" and in the other "war, invasion or insurrection, real or apprehended". By section 23 the Governor in Council, in case of an emergency, may place the naval service of Canada, or any part thereof, at the disposal of His Majesty for general service in the Royal Navy and by section 24 whenever action of this kind is taken Parliament, if not sitting, must be called together within fifteen days.

By section 48 the Naval Discipline act 1866 of the Imperial Parliament and acts passed in amendment thereof, also the Naval Disci-King's Regulations and Admiralty Instructions, are made Imperial Parapplicable to the naval service of Canada and are to have the liament applisame force in law as if they formed part of the Canadian service of act.

Other questions relating to administration, the engagement of officers and seamen, naval establishments, shipyards, sup-Regulations plies, target practice, discipline, etc., are dealt with in the act, for naval but much is left to be settled by regulations which the Gov-generally. ernor in Council is empowered to make for carrying out the act and for the organisation, training, discipline, efficiency, administration and good government generally of the naval

¹ See Year Book of 1909, pp. xviii-xx.

service. Such regulations upon publication in the Canada Gazette will have the force of law.

Progress of naval organisation.

Since the passing of the act considerable progress has been made with the organisation of the new naval service, and appointments to the principal offices created under the act have been made. A Naval College at Halifax, Nova Scotia, has been established, and 21 boys, selected after competitive examinations held throughout Canada in November, are now being educated and trained. Two protected cruisers, the "Niobe" and "Rainbow", purchased from the Royal Navy by arrangement with the British Government for the training in Canadian waters of officers and men, arrived at Canadian ports—the "Niobe" at Halifax, Nova Scotia, on October 21 and the "Rainbow" at Esquimalt, British Columbia, on November 7. These events of historical importance were signalised by appropriate ceremonies and by presents of plate from the province of Nova Scotia to H.M.C.S. "Niobe" and from the province of British Columbia to H.M.C.S. "Rainbow". After the arrival of these ships recruiting was commenced throughout the country, and by March 31 1911 185 recruits had been entered in the "Niobe" and 38 in the "Rainbow", making a total of 223

the Rambow.

H. M. C. S. "Niobe", Commander W. B. Macdonald, R. N., is Description of a protected cruiser of 11,000 tons, measuring 435 feet by 69 the Niebe and feet and with engines of 16,500 h.-p. Her armament consists of sixteen 6-inch, twelve 12-pounder and three 3-pounder quickfiring guns, two Maxims and two 12 pounder field guns. There are two submerged torpedo tubes. She has coal storage for 1,000 tons, her speed is 20.5 knots and she carries a complement of 705 officers and men. H. M. C. S. "Rainbow", Commander J. D. D. Stewart, R. N., a smaller vessel of 3,600 tons, measures 300 feet by $43\frac{1}{2}$ feet, has engines of 9,681 h.-p. and carries two 6-inch, eight 6-pounder and one 3-pounder quick-firing guns, with four Maxims and one 12-pounder field gun. With coal storage for 400 tons, she steams 19.7 knots and has a complement of 273 officers and men.

Construction of dry docks.

Chapter 17, the Dry Docks Subsidies act 1910, repeals the similar act previously in force and provides for the payment of subsidies by the Dominion Government for the construction and equipment of dry docks in three classes, according to their cost for the purposes of subsidy calculation, viz., (1) for naval and general purposes costing not more than \$4,000,000; (2) costing not more than \$2,500,000; and (3) costing not more than \$1,500,000. Those of the first class must consist of docks in which the largest ships of the British navy can be received and repaired with ease and safety. Under section 17 it is provided that upon the application of the Governor in Council or any Minister, member of the King's Privy Council for Canada, ships or vessels in the British naval service, in the naval service of Canada, and other ships or vessels the property of or employed by His Majesty shall at all times be entitled to the

use of the docks in priority to all other vessels.

In July it was announced that the Government intended to call for tenders for the construction of the ships of the naval Tenders for programme, that is, four cruisers of the improved Bristol class struction. and six torpedo boat destroyers of the improved River class, all to be constructed in Canada, if possible. Subsequently firms desiring to tender were informed of the conditions of the contract and in February 1911 those firms, British and Canadian, who were willing to accept the terms of the contract, were invited to tender, the tenders to be submitted on May 1 1911.

On May 20 General Sir John French, Inspector General of the Imperial Forces, landed in Quebec for the purpose of inspection of inspecting the military forces of Canada. His report to the the Canadian military Minister of Militia and Defence, drawn up under 14 different forces. headings, contained a variety of valuable recommendations for improvement of the military organisation of the Dominion. He stated also that judging from the excellent material and the fine spirit apparent in all ranks, and taking also into consideration the marked progress made within the past few years and the evident signs of its continuance, he was inclined to think that so long as the present condition of affairs on the North American continent remained as it was, the existing system, if strictly administrated on a sound basis of peace organisation, should suffice to meet the needs of the Dominion.

The Report of the Imperial Inspector General having been referred by the Minister of Militia and Defence to the Inspector General General of the Canadian Militia, that officer (Major General Lake's report Sir P. H. N. Lake) submitted on September 14 a report upon the best method of giving effect to Sir John French's recommendations with which he stated, he was, speaking generally, in complete accord.

On the departure from Canada of Major-General Sir Percy H. N. Lake, K.C.M.G., C.B., after the expiration of his term General Order of service as Inspector General of the Canadian Forces and expressing Chief Military Adviser of the Canadian Government, the of services of Minister of Militia and Defence, in a letter to the Governor Sir Percy General of November 5, drew attention to the special character. Lake. and value of the services rendered since 1904 by Sir Percy Lake, and on behalf of the Canadian Government expressed high appreciation of his able, earnest and self-sacrificing services in the interest of the Canadian Militia. His Excellency, in a reply dated November 8, expressed most cordial agreement with what had been stated as to the excellence of Sir Percy Lake's work, and the correspondence was published under date of November 10 as General Order No. 157 in the Canada Gazette of November 19.

Visit to England of Queen's Own Rifles.

In connection with the fiftieth anniversary of the foundation of the Queen's Own Rifles as a Canadian regiment arrangements were made under which the regiment with rank and file 615 strong, proceeded to England to participate in the autumn

military manœuvres at Aldershot.

Arriving on August 28 the regiment took their full share in the operations and received well-earned encomiums for zeal, discipline and soldierly qualities. The troops were greeted everywhere in Great Britain with enthusiasm and on September 13 a detachment was received by His Majesty the King at Balmoral. Returning home the regiment landed on October 2 at Quebec where His Excellency the Governor General in a speech of welcome said that their visit appeared to have struck the popular imagination as an almost epoch-making move in the evolution of the Empire. The home coming was saddened by news of the death in England on September 26 of Lieut. R. M. Gzowski, a young officer of the regiment. All the expenses of the visit were defraved by the public-spirited generosity of the Commanding Officer, Col. Sir Henry M. Pellatt, K.C.V.O.

In September friendly visits were paid by the Canadian 43rd Military visits Regiment to Boston, Massachusetts, while on this side of the exchanged border the 3rd National Guard and 65th Buffalo Regiment w th the United States, from the United States were welcomed to Toronto on the occasion of the annual exhibition.

Fiscal relations with Germany and countries.

Prior to 1898 the tariff relations between Canada and Germany were governed by a treaty of May 30 1865 between Great Britain and Germany which contained clauses providing that no other foreign other or higher duties should be levied in the British colonies on the products of Germany than on the products of the United Kingdom. After the granting by Canada of the British preference in 1897 the treaty with Germany was denounced, and it terminated on August 1 1898, from which date therefore German goods became only entitled to enter Canada under the general tariff. This state of things Germany resented and penalised Canada by subjecting Canadian products to the higher duties of the German tariff instead of to the conventional tariff previously applied. The Canadian Government pointed out that the tariff relations between the United Kingdom and the Colonies were matters of domestic concern with which no foreign government could reasonably interfere, that Germany should not claim the same privileges that were granted by the Dominion to the Motherland, and that Canada was granting to Germany the same terms that were granted to other foreign countries. Germany however refused to accept this reasoning and continued to impose the penalising duties on Canadian products. Eventually therefore on November 28 1903 by Order in Council the Canadian Government, under section 7 of the Customs Tariff 1897, subjected German imports into Canada to a surtax of onethird over and above the duties specified in the general tariff,

and this surtax has remained in force until the present year. Lately however representations have been made to the Canadian Government by German Imperial consuls at Montreal as to the desirableness of a better understanding, and the contention that the products of Germany should receive in Canada the same treatment as the products of the United Kingdom was abandoned. Meanwhile the Franco-Canadian convention went into operation and Germany became desirous of being admitted to its benefits upon the same terms as France. Informal negotiations resulted therefore in a provisional agreement, dated February 15 1910, under which on or after March 1 1910 Germany conceded the conventional tariff rates of duty upon Canadian imports and Canada removed the surtax from German imports. It was further agreed that the question of a general convention between the two countries should be deferred for consideration at some mutually convenient time.

As the result of correspondence between the Minister of Finance and other consular representatives in Canada Orders Agreements of Council were passed on June 7 by which the benefit of the with Belgum, Canadian intermediate tariff was extended to specified goods, Italy, the produce or manufacture of Belgium, Holland and Italy. Under a provisional agreement dated June 6 1910, and pending the permanent regulation of commercial relations, Italy admits certain Canadian goods at the conventional rates in return for the benefit of the Canadian intermediate tariff extended to Italian imports. In all these cases it is a condition that goods must be conveyed without transhipment from ports of the respective countries or from a port of a British country into a sea

or river port of Canada.

The enactment of the United States Tariff on August 5 1909, by which the President of the United States was empow-United States ered to grant the benefits of the minimum tariff to the products of such countries as did not unduly discriminate in their tariff treatment against United States products, raised the question whether the Franco-Canadian treaty, the benefits of which were automatically extended under most favoured nation clauses in certain treaties to various foreign nations among which the United States was not included, did not effect such a discrimination. As the outcome of negotiations conducted during March at Ottawa, Albany and Washington, Canada agreed to apply the intermediate tariff instead of the general tariff to the United States imports of thirteen named articles, thus extending to the United States the same benefits in respect of those articles as are accorded to France under the Franco-Canadian treaty. This agreement was carried into effect on the part of Canada by an act of the Dominion Parliament to amend the Customs Tariff, 1907, chapter 16, assented to on May 4, and on the part of the United States by a proclamation of the President admitting Canadian products to the benefits of the minimum tariff.

Reciprocity negotiations with the United States.

Throughout these negotiations the President and other American representatives maintained the most friendly attitude towards Canada, and a desire was expressed on the part of the United States for the opening of further negotiations having for their object the establishment of permanent reciprocal trading relations between the two countries. This took formal shape in a letter addressed by the United States Secretary of State on May 12 to H. M. Ambassador at Washington. Subsequently, in November 1910 at Ottawa, and in January 1911 at Washington, conferences took place between the Canadian and American representatives, with the result that an agreement was arrived at and formally embodied in letters exchanged on January 21 1911 between the Canadian Ministers of Finance and Trade and Commerce and the United States Secretary of State. In these letters it was agreed that the desired tariff changes should not take the formal shape of a treaty, but that the Governments of the two countries should use their utmost efforts to bring about such changes by concurrent legislation at Washington and Ottawa. Accordingly legislative proposals giving effect to the agreement have been laid before the Dominion Parliament and the United States Congress for settlement in 1911.

Harvest results of 1910.

Outstanding features of the season were the uniform excellence of the crops throughout eastern Canada and the diminution of yield caused by prolonged drouth throughout the southern portions of the Northwest provinces. The result was a lowered average of production for the whole of the Dominion and a total yield of wheat less than that of the previous year from an area larger by over 11 million acres. The monthly crop reports issued during the season of growth by the Census and Statistics Office reflected plainly the difference between the conditions in the east and those of the west. Throughout the Maritime provinces and in Quebec the percentage of a standard condition for spring wheat and most other cereals was maintained at well over 90 and in Ontario it was over 84, while in the Northwest provinces at the end of July the figures fell below 57 for wheat, oats and barley in Manitoba and below 70 in Saskatchewan and Alberta. In Alberta at the same date oats were down to 53.

Final estimates of production and value of field crops 1910. The final estimates of the production and value of the field crops of 1910 were issued on December 30, and the following table gives the details of area, yield and value for each crop for the year 1910, together with the corresponding figures for 1909 and 1908:

			<u> </u>			
Crops	Area	Yield per acre	Total yield	Weight per mea- sured bushel	Average price	Total value

The table shows that an area of 32,711,062 acres yielded in 1910 a harvest which computed at local market prices had a Yields and value of \$507,185,500 as compared with \$532,992,100 from values of 30,065,556 acres in 1909. In 1910 the value of all field crops in Prince Edward Island was \$9,988,100, in Nova Scotia \$21,-203,000, in New Brunswick \$18,959,000, in Quebec \$97,107,000, in Ontario \$204,002,000, in Manitoba \$55,206,000, in Saskatchewan \$84,138,400 and in Alberta \$16,582,000.

Value of occupied farm lands.

At the end of December statistics were collected from correspondents as to the value of occupied farm lands per acre, the values of farm animals and wool, and the wages of farm and domestic help. The average value of occupied farm land in Canada was placed at \$38.45 per acre as against \$38.60 in 1909. For the provinces the similar values were: Prince Edward Island \$31.24, Nova Scotia \$24.72, New Brunswick \$18.50, Quebec \$42.50, Ontario \$48, Manitoba \$28.67, Saskatchewan \$22, Alberta \$24, British Columbia, \$74. All these values were lower than in 1909 except in Saskatchewan, Alberta and British Columbia where they were somewhat higher.

Average wages of farm and domestic help

The following table shows by provinces the average wages of farm help, including the value of board, per month in the summer season, and per year, and the average value of board per menth:

Provinces	Average wages of farm help including value of board per month summer season per year				of b	ge value oard nonth

Numbers of live stock in 1908, 1909 and 1910. Data as to the numbers of live stock in Canada were collected from correspondents on June 30, and the following table gives the estimated numbers of horses, cattle, sheep and swine for each of the three years 1908, 1909 and 1910 with values as estimated at the end of each year:

Live stock	1908	1909	. 1910

The total value of farm animals, computed from the foregoing averages and the number of animals on farms in June, was \$593,768,000 as against \$558,819,000 in 1909. The value of horses is put down at \$293,398,000, of milch cows at \$121,-

613,000, of other horned cattle at \$131,781,000, of swine at \$31,157,000, and of sheep at \$15,819,000, and the average value as \$132.50 for horses, \$42.60 for milch cows, \$30.90 for other horned cattle, \$6 for sheep and \$11.30 for swine.

Railway statistics of Canada. According to the report of the comptroller of railway statistics the increase in the railway mileage of Canada for the year ended June 30 1910 was 627 as compared with 1,138 in 1909 and 520 in 1908. The total railway mileage in actual operation on June,30 1910 was consequently 24,731 as against 24,104 in 1909. The total does not include however about 900 miles of the Grand Trunk Pacific Railway which was opened for traffic during the year although officially returned as being still under construction. It may therefore be fairly assumed that about 1,500 miles of additional railway became really available during the year. On June 30 1910 there were it is estimated at least 4,500 miles of railway under construction in Canada.

Capital, passengers, freight, earnings, etc.

During the year ended June 30 1910 \$101,816,271 were added to the total capital liability of railways in Canada. This brings the total amount of capital invested in Canadian railways to \$1,410,297,687 of which \$687,557,387 are stocks and \$722,740,300 are funded debt. Eliminating the capital liability of railways under construction and the mileage of government owned lines the capital obligation per mile is \$52,361. The railways of Canada carried 35,894,575 passengers and 74,482,866 tons of freight in 1910, an increase of 3,211,266 passengers and of 7,640,608 tons of freight as compared with 1909. The aggregate earnings for the year were \$173,956,217, an increase of \$28,899,881. The operating expenses were \$120,405,440 as compared with \$104,600,084 in 1909. The number of passengers carried by the electric railways in Canada was 360,964,876 as compared with 314,026,671 in 1909, and the gross earnings were \$16,821,377 as compared with \$14,611,484 in 1909.

Canadian Pacific Railway. On the main and branch lines of the Canadian Pacific Railway the total mileage in operation at the end of March 1910 was 10,271, an increase of 392 miles over the previous year. The number of passengers carried during the year was 11,050,924, an increase in the year of 1,375,849. The Company's gross revenue was \$94,989,490 and its net revenue \$33,839,959, increases respectively of \$8,676,169 and \$10,884,383 over 1908-09.

Irrigation schemes.

The Company's irrigation land is divided into three sections. In the western section, consisting of 1,039,620 acres, the area at present under irrigation is 370,000 acres. The water is obtained from the Bow river. The main canal has an average depth of 10 ft., with a width at the bed of 44 ft., and a width on the water line of 84 ft. This canal is 17 miles long. There are three subsidiary canals with a depth of 8 ft.; these, together with the above, make up a total length of 250 miles The distributing ditches extend to 1,329 miles, making a total o

some 1,600 miles. The eastern section is composed of 1,156,-224 acres, of which 440,000 acres are to be irrigated. To do this a dam will be constructed containing 1,000,000 cubic yards. The sluices will permit of a discharge of 3,000 cubic feet of water per second. The mileage of the canals, distributing ditches, etc., for irrigating this eastern section will amount to about 3,500, and the estimated cost of the work is \$8,500,000. It is further intended to irrigate a central section. This section consists of 901,737 acres, and it is proposed to commence

by irrigating 70,000 acres.

Settlers coming from Great Britain and European countries, particularly those of the better class, found it diffi-Roudy-made cult because of their inexperience to take up farms in a new farms. country, live in such habitations as could be hurriedly provided, and submit to the conditions that must necessarily attend the building up of a home in these circumstances. To overcome this difficulty a plan was devised for preparing and offering to settlers what have popularly become known as "ready made farms." Up to the present time all of these have been established in Alberta, most of them in the irrigation block. An area of land, containing from eighty to one hundred and sixty acres, depending upon its location, is fenced, a modest but comfortable house and a stable are built upon it, about 25 p. c. of the land is prepared for crop, and this is offered to the settler at the price of the land plus the cost of the improvements, payable in annual instalments covering a period of from six to ten years. Thus the settler is enabled on arriving in the country to go directly to a comfortable home and to commence farming without any of the trials to which earlier settlers were necessarily subjected. The popularity of this plan is indicated by the fact that the demand for the farms is each year very much in excess of the supply. An experimental farm, manned by experts whose advice will always be at the service of the new-comers, has been established in connection with these farms.

Upon the western section of the new National Transcontinental Railway the total mileage of track laid by the Grand National Trunk Pacific Railway Company to December 31 1910 was nental Rail-1,469 made up as follows: main line, Winnipeg, Man., to Prairie way. Creek, Alta., 980 miles; main line, Prince Rupert to Copper River, B.C., 100 miles; Lake Superior Branch, Ont., 188 miles; Melville to Canora, Sask., 55 miles; Melville to Regina, Sask., 38 miles; Young towards Prince Albert, Sask., 25 miles; Tofield towards Calgary, Alta., 83 miles. The total number of miles in operation was 1,369, including the main line, Winnipeg, Man., to Edson, Alta., 922 miles; Lake Superior Branch, Ont., Fort William to Transcontinental Railway, 188 miles; Transcontinental Railway, Section F., Lake Superior Junction to Winnipeg, 259 miles. At the Prince Rupert terminus provision has been made for handling the traffic by the erection of

wharves and warehouses, but work on the ultimate permanent lay-out has not yet been commenced. The eastern division of the National Transcontinental Railway, which is under construction by the Transcontinental Railway Commission, extends from Moncton, N.B., to Winnipeg, the through mileage from Moncton to the Union Station at Winnipeg being 1,805 miles. Of this division 68.56 p. c. was completed at March 31 1911. That portion of the line between Winnipeg and Lake Superior Junction (where the Grand Trunk Pacific Company's Fort William Branch joins the main line) was, with the exception of the entrance into Winnipeg, practically completed last fall, and a fair share of last season's western crops was transported by the Grand Trunk Pacific Railway Company over this portion of the line to Fort William. At the end of March 1911 1,388 miles were graded, 1,264.46 miles of track were laid (including sidings) and 784.73 miles of telegraph line were completed.

Various important undertakings of the Grand Trunk Rail-Grand Trunk way Company have made progress during the year. The Railway. construction of the Château Laurier Hotel and of the new Central passenger station at Ottawa has been pushed forward. The work is expected to be completed by the fall of 1911. Work was practically finished on the renewal of the bridge across the St. Lawrence River at Coteau. The bridge has 22 spans and a total length of 4,085 feet. The cost is approximately \$500,000. The necessary location was completed and right-of way secured at Montreal for the construction of a branch line connecting with the Jacques Cartier Union Railway-which the Grand Trunk now controls-and extending around the mountain to a connection with the Canadian Pacific Railway, which will give the Grand Trunk what is practically a belt line around the commercial metropolis of the Dominion, and enable it to cater for business to and from the large manufacturing industries that are now located and are being established in the eastern and northern sections of the city. The new railway is being built under the name of the Lachine, Jacques Cartier and Maisonneuve Railway. In September 1910 terminal improvements were commenced at Toronto. Other works undertaken during the year were the revision of grades between Midland and Port Hope and the construction of a connection between Tiffin and Wyevale; also the construction of new roundhouses and terminal facilities at Richmond, P.Q. and Belleville, Ont. The Grand Trunk was empowered by act of Parliament to acquire the securities of the Montreal and Southern Counties Railway—an electric line already constructed which runs from Montreal to Longueuil. crossing the St. Lawrence River over the historic Victoria. Jubilee Bridge upon independent tracks, between Montreal and St. Lambert.

Great developments have also taken place on the Canadian Northern Railway, and during the year 1910 a new line of Canadian steamers between Canada and Great Britain was inaugurated Northern by the Company. The new service, known as the "Royal Line," Railway. has Bristol for its English port, and the two first steamers of the Line, the "Royal Edward" and the "Royal George" are now making fortnightly sailings between Montreal and Bristol.

The long talked of project for the construction of a railway to the Hudson Bay, in order to provide an additional outlet for Hudson Bay the shipment to Liverpool of Canadian grain, took definite Railway. shape during the year. Parliament decided that the line should be built and voted a sum of \$500,000 for the commencement of operations. Contracts were signed for the construction of a bridge over the Saskatchewan River at The Pas; and on September 6 the ceremony of turning the first sod of the new railway was performed by the Hon. George Graham, Minister

of Railways and Canals.

On pp. xxvii and xxviii of the Year Book for 1909 reference was made to a statistical investigation by Mr. George Paish into British capital the amount of British capital invested abroad. In a second invested in paper, published in the Journal of the Royal Statistical Society for January 1911, Mr. Paish estimated that the total of Great Britain's visible capital investments in other lands now reached the enormous total of \$15,534,400,000, geographically distributed as follows: American countries, \$8,273,333,000, or 53 p. c.; Asia \$2,433,333,000, or 16 p.e.; Africa \$2,214,333,000, or 14 p.c.; Australasia \$1,883,400,000, or 12 p.c.; and Europe \$730,-000,000, or 5 p.c. The total amount of British capital invested in Canada is given as \$1,815,267,000. Of this sum no less than \$493,266,742 has been subscribed during the past three years, viz., \$152,373,182 in 1908, \$183,412,325 in 1909 and \$157,481,235 in 1910, the total for these three years being considerably larger than the sum invested during the same period in any other country. The total invested during these three years in all other countries is \$2,515,390,603, so that the amount placed in Canada represents 19.6 p.c., or nearly one-fifth of the total.

The total foreign trade of Canada for the calendar year 1910 amounted to \$740,024,880, exclusive of coin and bullion, as Canadian compared with \$647,702,779 the final figures of 1909. Imports trade with in 1910 amounted to \$444,610,449 are compared with \$261 other countries. in 1910 amounted to \$444,610,449 as compared with \$361, tries. 688,963 and exports to \$295,414,431, as compared with \$286,-013,816 in 1909. Trade with Gre t Britain reached a total of \$248,768,284 as compared with \$235,077,097 in 1909. Imports from Great Britain in 1910 were \$108,272,427 as compared with \$89,977,908 in 1909 and exports to Great Britain in 1910 were \$140,495,857 as compared with \$145,099,189 in 1909. Trade with the United States reached the total of \$383,173,805 as compared with \$321,990,972 in 1909. Imports from the United States were \$209,464,731 as compared with \$216,-

179,707 in 1909 and exports to the United States were \$113,-709,074 as compared with \$105,811,265 in 1909.

Revenue of Ca..ada.

For the fiscal year ended March 31 1911 the revenue of Canada on consolidated fund account reached the total of \$117,780,409.78, the highest record for any year in the history of the Dominion. The expenditure amounted to \$87,773,998.32, so that there was a surplus of \$30,006,411.46. Out of this surplus it was possible to provide for all the capital and special expenditure of Canada for the year 1910-11 other than that of the National Transcontinental Railway, for which, however, out of the surplus revenue a sum of \$18,506,086.19 was also available.

Immigration statistics.

For the fiscal year ended March 31 1910 the number of immigrant arrivals was 208,794, as against 146,908 in 1908-09 and 262,469 in 1907-08. Of the total number who arrived in 1909-10 59,790 were from the United Kingdom, 103,798 from the United States and 45,206 from other countries. number of immigrants during the calendar year 1910 was 303,091 as against 184,281 in 1909, and they comprised 112,638 from the United Kingdom, 124,602 from the United States and 65,851 from other countries. For the fiscal year ended March 31 1911 the number of immigrants was 311,084, including 123,013 from the United Kingdom, 121,451 from the United States and 66,620 from other countries. The figures for the past fiscal year are the largest yet recorded, and it is also satisfactory that the proportion of British and American immigrants remains high, being over 78 p. c. of the total. The standard of immigration has been raised by the regulations now in force, and the class of immigrants from the United Kingdom is superior to what it used to be. From the United States there continues a large annual influx of desirable settlers who, experienced in prairie farming and familiar with our climate, customs and general conditions, are likely to add materially to the wealth and prosperity of the country.

Homestead entries.

The total number of ordinary homestead entries for the calendar year 1910 was 48,257 as compared with 37,061 in 1909, 38,559 in 1908 and 29,414 in 1907. In 1910 3,132 entries were made in Manitoba against 2,526 in 1909, 26,878 in Saskatchewan against 19,354 in 1908, 18,013 in Alberta against 14,907 in 1909 and 234 in British Columbia against 274 in 1909. The number of pre emptions under the Dominion Lands act was 18,352 in 1910 (10,795 in Saskatchewan and 7,557 in Alberta) against 14,613 in 1909 (8,570 in Saskatchewan and 6,043 in Alberta). The number of purchased homesteads under the act was 1,863 in 1910 (1,357 in Saskatchewan and 506 in Alberta) against 997 in 1909 (695 in Saskatchewan and 302 in Alberta). The entries for South African volunteer homesteads numbered 2,186 in 1910 (17 in Manitoba, 1,259 in Saskatchewan, and 910 in Alberta against 2,624 in 1909 (10 in Manitoba, 1,434 in Saskatchewan and 1,180 in Alberta).

According to the annual preliminary report of the Division of Mineral Resources and Statistics of the Department of Mines Statistics of the value of the mineral products of Canada in 1910 was mineral production. \$105,040,958, as compared with \$91,831,441, the finally revised total of 1909. This represents an increase of over 14 p. c., fairly well distributed amongst the more important ores and minerals produced in Canada. Of the total production in 1910 \$49,169,826, or 46.8 p. c., is credited to the metals and \$55,871,-132, or 53.2 p. c., to the non-metallic products. Amongst the individual products coal still contributes the greatest value, constituting 28.4 p. c. of the total; silver is next with about 16.3 p. c., nickel third with 10.6 p. c., gold 9.7, clay products 7.2, copper 6.8 and cement 6.1 p. c. respectively.

Of the principal metals the value in 1910 of gold was \$10,-224,910, compared with \$9,382,230 in 1909 when the quantity Production of produced was 453,865 oz. The increase in value is nine p.c. Silver principal metals and amounted to 31,983,328 oz., value \$17,106,604, compared with of coal. 27,529,473 oz., \$14,178,504 in 1909 an increase in quantity of 16 and in value of 20 p.c. Copper 56,598,074 lb., \$7,209,463: compares with 52,493,863 lb., \$6,814,754 in 1908 an increase in quantity of eight and in value of six p.c. Lead 32,987,508 lb., \$1,237,032 against 45,857,424 lb., \$1,692,139 in 1909 shows a decrease in quantity of 28 and in value of 27 p.c. Nickel 37,271,033 lb., \$11,181,310 against 26,282,991 lb., \$9,461,877 shows an increase in quantity of 42 and in value of 18 p.c.

The production of coal in 1910 was 12,796,512 short tons of the value of \$29,811,750, as compared with 10,501,475 tons,

\$24.781.236 in 1909.

Mr. Thomas Gibson, Deputy Minister of Mines for the province of Ontario, has supplied a special statement as to mines Mineral production of and minerals in the province during the calendar year. He Ontario 1910. writes that as compared with 1909 there was a marked increase in the mineral production of Ontario during 1910, the aggregate value being \$39,313,895 as against \$32,981,375 in 1909. The products are valued in the form and at the point of production, not as refined metals or finished articles. The principal metallic output of Ontario is in silver and nickel. Of the former the yield was 30,651,417 ounces, having a value of \$15,481,322. Practically all of this came from the mines of Cobalt, which from their opening in 1904 to December 31 1910 produced a total of 94,064,189 ounces of silver valued at \$48,368,333. The following figures show the rapid development of the Cobalt silver field:

4 .		
Year.		Silver produced.
		OZ.
1904		206,875
1969		
1910		
	(D .)	0.1.0.11.100

tion of Cobalt district.

The producing mines last year numbered 38, including Nipis-Silver produc-sing (5,590,080 oz.), La Rose (3,484,754 oz.), Crown Reserve (3,255,569 oz.), Kerr Lake (2,877,299 oz.), Coniagas (2,621,681 oz.), McKinley-Darragh-Savage (2,606,891 oz.), Temiskaming (1,994,226 oz.), Buffalo (1,629,328 oz.), Hudson Bay (985,552 oz.), Trethewey (846,579 oz.). O'Brien also yielded heavily. Of the total, two mines in South Lorrain produced 221,233 oz. and six in Gowganda and Elk Lake 481,523 oz. These fields are similar to Cobalt in the assemblage of minerals, and lie the former eight miles to the southeast and the latter about forty miles to the northwest. In actual mining operations the chief features of last year in the Cobalt camp were the general introduction of electric power for use in the mines and works, the extension of the concentration of lowgrade ores, and the production of merchantable bullion.

Production of nickel.

The nickel output amounted to 19,140 tons, valued at \$4,-005,961. About 504 tons of nickel are estimated to have been contained in the silver-cobalt ores raised at Cobalt, the remainder being the product of the nickel-copper mines of Sudbury. The producing companies are the Canadian Copper Co., Copper Cliff, and the Mond Nickel Company, Victoria Mines. There were smelted during the year 628,947 tons of ore, the product being 45,033 tons of bessemer matte, in which form it is exported for final separation of the metals in the United States and England. Besides the nickel the matte contained 9,630 tons of copper, valued at \$1,374.103.

Of pig iron there were produced 447,351 tons, valued at \$513,721; of cobalt 1,098 tons worth \$54,699, and of zinc ore

576 tons worth \$5,760.

Pig iron, cobalt and zinc.

The Porcupine goldfield.

The output of gold was 3,619 ounces, worth \$68,498. The new goldfield at Porcupine underwent vigorous development during the year. At the Hollinger mine much underground work has been done, and both here and at the Dome mine large plants are being erected for treatment of the ore. Many other properties are being prospected, and the results of this and next year's work will no doubt show whether the camp will prove rich and permanent. Electric power for working the mines and plants is being generated on the Mattagami river, both above and below the camp. A branch of the Temiskaming and Northern Ontario railway is now being built and is expected to reach Porcupine in July 1911.

Non-metallic products.

The non-metallic production of Ontario comprises a varied The Portland cement industry is steadily list of substances. growing, the output last year being 2,471,837 barrels, valued at \$3,144,343 Other building materials, such as brick, lime and stone, were produced in large quantities, clay and stone of suitable quality being widely distributed and easy of access. Mineral fuels comprise petroleum and natural gas. The production of the former is declining and of the latter increasing. In 1910 some 11,004,357 gallons of crude petroleum were obtained,

as against 14,723,105 gallons in 1909. Natural gas rose in value from \$1,188,179 in 1909 to \$1,491,239 in 1910. The area productive of gas is being extended so as to cover a large part of the northern shore of Lake Erie. Salt, mica, corundum, graphite, talc, arsenic, calcium carbide, etc., contributed to the non-metallic output, the total value of which was \$11,152,217.

The mineral industry in Ontario gave employment to 16,688 Number of men, whose wages amounted to \$10,532,257.

amount of

On October 11, at Berlin, electrical energy generated by the Niagara Falls was turned on for the first time. At the inaugural Electrical ceremonies on this occasion the button effecting connection was energy in Ontario. pressed by Sir James Whitney, premier of Ontario, assisted by the Hon. Adam Beck, chairman of the Hydro-Electric Power Commission.

This installation at Berlin is the first outcome of earnest efforts put forth since the beginning of the century with a view The Hydroto utilisation of electrical energy generated by the water powers Electric Power Comof Ontario and especially by the Niagara Falls. A commission mission, appointed by the Ontario Legislature on July 5 1905 made a series of valuable investigations which showed that the development and transmission of electrical energy from the Falls was not only practical, but that such energy could be sold at a much lower rate than was then being charged by the companies in existence. The present Hydro-Electric Power Commission. which is composed of the Hon. Adam Beck, Mr. J. S. Hendry. M.P.P., and Mr. W. K. McNaught, M.P.P., was incorporated by the Ontario Legislature on May 14 1906, its powers being revised and amplified by a subsequent act of April 20 1907. The Commission has now erected a transformer station at the Niagara Falls, and has contracted with the Ontario Power Company for a 24 hours' continuous service of power. The present arrangements of the Commission include the supply of power to 15 municipal corporations, viz., Toronto, London, Guelph, St. Thomas, Woodstock, Galt, Hamilton, Stratford, Berlin, Waterloo, Preston, St. Mary's, Ingersoll, Hespeler and New Hamburg; but eventually it is hoped to supply power from the Falls to the municipalities throughout the whole of the southwestern portion of Ontario from Kingston to the Georgian Bay and south. The northeastern portion of Ontario from North Bay to the St. Lawrence River will doubtless also in time be served by a similar system established at appropriate generating points.

It is estimated that the average cost of the power supplied to the 15 towns mentioned will be, for a continuous 24 hours' con-Cost of sumption, about \$22 per h. p. per annum, as against \$60 per system. h.p, the price of the same energy generated by coal and steam; so that upon an estimated total average consumption of 27,350 h.-p. the difference in cost between the two systems

represents a saving of about \$1,039,000 per annum, or, capitalised at 5 per cent, a total value of over \$20,000,000. Other benefits in regard to public health and in the economising of time and labour which may be anticipated from the cheapened diffusion of electrical energy are incalculable.

Industrial disputes of the year.

Eighty-seven strikes and lockouts occurred in 1910 as compared with 69 in 1909 and in 1908. Approximately the number of persons affected was 19,543 in 1910, 17,881 in 1909, 26,332 in 1908 and 34,694 in 1907. Working days lost numbered about 677,534 as against 842,275 in 1909, 708,194 in 1908 and 613,986 in 1907. The two principal disputes were a strike of coal miners at Springhill, Nova Scotia, and of employés of the Grand Trunk Railway. The former began on August 10 1909 and was still in existence at the en lof 1910, although there was some improvement compared with the previous year. The latter began on July 18 1910 when employes in the train and yard service of the Grand Trunk Railway Company stopped work on their failure to reach an agreement with reference to proposed new rates of wages and working rules. The strike was settled on April 2 through the friendly intervention of the Minister of Labour and the Minister of Militia and Defence. While the strike was in progress business interests suffered through the congestion of freight, and the loss of earnings to the company alone was estimated at about \$1,000,000. About 2,750 employés were directly involved in the dispute, and 4,800 men were thrown out of employment by it for a week.

Statistics of lusiness failures.

According to Bradstreet's the total number of failures in Canada in 1910 was 1,465, the realised assets amounting to \$7,022,853 and the liabilities to \$15,563,539. As compared with 1909 the number of failures was less by 7 p.c., while the liabilities show an increase of about 22 p.c. Messrs. R. G. Dun & Co. estimated the number of failures at 1,256, with nominal assets of \$11,013,396 and liabilities of \$14,514,650. In Messrs. Dun's statement however are not included banking failures of which there were two in 1910 with liabilities amounting to \$2,546,871. The number of defaulters, notwithstanding the great expansion of trading operations, compares favourably with previous years, the increase of total indebtedness in 1910 being attributed to several unusually large failures.

Department of the Secretary of State.

The number of charters of incorporation issued during the fiscal year 1910-11, including supplementary charters, was 544, as compared with 493 for the last fiscal year 1909-10. The total capital sation of the new companies during the fiscal year 1910-11 was \$458,415,800, and the capital of existing companies was increased during the year by \$24,715,600, making the total of the capital authorised for the fiscal year to amount to \$483,131,400, as compared with \$348,377,800 for the previous fiscal year. The revenue of the Department, derived mainly

from fees upon charters, was \$196,518 for the fiscal year 1910-11, as compared with \$148,250 for 1909-10, and \$91,-687 for 1908-09.

The naturalisations effected under the Naturalisation act for the twelve months ended June 30 1910 numbered 15,071. Of Naturalisa-

these 6,085 were formerly citizens of the United States.

The Canada Temperance act, which prohibits the sale of intoxicating liquors in places that have adopted it, and which The Canada is administered by the Department of the Secretary of State, is Temperance now in force in twenty-two counties or cities. Of these ten are in Nova Scotia, ten in New Brunswick and two in Manitoba. The act is not in force in any of the other provinces or territories of the Dominion. There were two elections under the act in 1910. Both were in the province of British Columbia, and upon petitions to bring the act into force, the one in the city of Prince Rupert, and the other in the city of Chilliwack. In each case the petition was defeated.

The Juvenile Delinquents act 1908 was put into force in three places during the year 1910, viz., in the city of Vancou-Treatment of ver, B.C., by proclamation dated July 9, in the city of juvenile de-Victoria, B. C., November 3, and in the city and royalty of Charlottetown, P. E. I., November 25. Ottawa and Winnipeg having adopted the act in 1909 there are now five cities in

Canada to which it applies.

Standards of quality for meat and meat products, for grain and grain products and for milk and milk products were made Food under the Adulteration act, R.S. 1906 c. 133 s. 26, and were standards published in the Canada Gazette of October 29 (meat), Novem- of quality. ber 5 (grain) and November 12 (milk).

On May 31, which was the eighth anniversary of the Peace of Vereeniging, there came into force the South Africa act The Union of 1909 of the Imperial Parliament by which Cape Colony, Natal, the Transvaal and the Orange River Colony were formed into a legislative union under the name of The Union of South Africa, the Parliament consisting of a Senate and a House of Assembly. The first Parliament of The Union of South Africa was opened at Cape Town on November 4 by T. R. H. the Duke and Duchess of Connaught, as representing Their Majesties the King and Queen. The Government of the Dominion of Canada was represented on this occasion by the Hon. Rodolphe Lemieux, Postmaster General.

The British imperial penny postage arrangement has been extended to the Indian post offices at Bahrein, Guadar and Canadian Muscat, and to the British and French post offices in the postal service French settlements in India. The conventions for the exchange of parcels post parcels with the United Kingdom, Jamaica, Trinidad, St. Lucia, Barbados, Leeward Islands and British

Guiana have been amended, and new conventions have been made with the Bahamas and Mexico. Under these amended and new conventions the rate of postage on parcels sent to each of the countries and colonies mentioned is 12 cents for each pound or fraction thereof, and the maximum weight for a single parcel is 11 pounds.

Automatic stamp vending machines.

During the year the Department has tried the experiment of placing automatic stamp vending machines in the principal cities of the Dominion. The machine adopted is one of great simplicity of operation. Before adopting it the Department made very careful inquiries, and learned that this machine was being used with great success in London, England. A special test was also made at the Toronto Exhibition last year, and the muchine there sold on a busy day nearly 3,000 stamps.

Anglican bi-centenary and the Eucharistic Congress.

In September two ecclesiastical events created widespread interest, viz., the bi-centenary celebrations of the Church of England in Canada, at Halifax, Nova Scotia, including the dedication of All Saints' Cathedral, Halifax, as a memorial of the first Anglican service in Canada on October 10 [o.s.] 1710, and the 21st Eucharistic Congress of the Roman Catholic Church at Montreal. His Majesty King George sent gracious replies to loyal messages from the representatives of both bodies.

The London Gazette of April 26 announced that H. M. The Award of the Albert Medal of the First Medal of the First Class upon Mr. Thomas Reynolds, railway conductor, of North Bay, Ontario, for conspicuous gallantry in saving the lives of eleven persons on the occasion of the disaster on the Canadian Pacific Railway at the Spanish River Bridge on January 21 1910. The medal was presented to Mr. Reynolds in the name of His Majesty by His Excellency the Governor General of Canada at Montreal on March 16.

Monday October 31 was observed as a day of general thanksthanksgiving giving to Almighty God for the bountiful harvest and all other blessings with which Canada has been favoured during the year.

The Senate.

The Hon. Louis Lavergne of Arthabaska, Quebec, was appointed and sworn in as a Senator for the electoral divison of Kennebec, Quebec, in the room and stead of the Hon. Sir George A. Drummond, deceased.

House of Commons.

The following three members were elected to fill vacancies in the House of Commons which occurred during the year, viz., John D. Sperry, for Lunenburg, Nova Scotia; Albert Allard for the city of Ottawa; Arthur Gilbert for Drummond and Arthabaska, Quebec.

Obituary.

The following deaths occurred during the year: Feb. 2. The Hon. Sir George Alexander Drummond, K.C.M.G., C.V.O.,

aged 81. Feb. 9. The Hon. George B. Baker. Feb. 11. John Charlton, formerly M.P. for North Norfolk. May 6. H. M. King Edward VII. June 7. Professor Goldwin Smith, aged 86. Aug. 7. The Hon. Jean Alfred Gagné, judge of the superior court of Quebec. September 27. The Hon. Duncan Cameron Fraser, Lieut.-Governor of the province of Nova Scotia.

June 1. Benjamin Rogers, of Alberton, P.E.I., to be Lieut.- Lieut.-Governors.

Governor of the province of Prince Edward Island.

October 5. His Honour George Hedley Vicars Bulyea, of Edmonton, to be Lieut. Governor of the province of Alberta. George William Brown, of Regina, to be Lieut. Governor of the province of Saskatchewan.

October 18. The Hon. James Drummond McGregor of New Glasgow, N.S., to be Lieut.-Governor of Nova Scotia in the room and stead of the Hon. Duncan Cameron Fraser, deceased.

Jan. 11. Charles Archer, K.C., to be a puisne judge of the superior court in and for the province of Quebec in the room Judicial appointments and stead of Mr. Justice Curran, deceased.

Jan. 11. The Hon. William Alexander Weir, K.C., of Montreal, to be a puisne judge of the superior court in and for the province of Quebec in the room and stead of the Hon. Mr. Justice Champagne, transferred to the district of Ottawa.

Feb. 7. The Hon. Thomas G. Mathers, to be chief justice of the court of king's bench for Manitoba with the style of Chief Justice of the King's Bench, in the room and stead of Joseph

Dubuc, resigned.

Feb. 7. The Hon. James Emile Pierre Prendergast to be a puisne judge of the court of king's bench for Manitoba in the room and stead of the Hon. Mr. Justice Mathers, promoted to be chief justice of the court of king's bench.

April 6. James Thomas Brown, K.C., of Moosomin, Saskatchewan, to be puisne judge of the supreme court of Saskatchewan in the room and stead of the Hon. Mr. Justice Prendergast,

transferred to the court of king's bench, Manitoba.

April 9. The Hon James Magee to be judge of the court of appeal for Ontario with the title of Justice of Appeal in the room

and stead of the Hon. Featherston Osler, retired.

April 9. William Edward Middleton, K.C., of Toronto, to be a judge of the supreme court of judicature for Ontario, a justice of the high court of justice for Ontario and a member of the chancery division of the said court of justice in the room and stead of the Hon. Mr. Justice Magee, transferred to the court of appeal for Ontario.

June 23. Hugh Amos Robson, K.C., of Winnipeg, to be a

puisne judge of the court of king's bench for Manitoba.

July 6. The Hon. Lawrence John Cannon, puisne judge of the superior court in the province of Quebec, to be transferred from the district of Three Rivers to the district of Quebec.

Judicial

July 6. The Hon. François Siméon Tourigny, a puisne judge of the superior court of the province of Quebec, to be transferred appointments from the district of Arthabaska to the district of Three Rivers in the room and stead of the Hon. Mr. Justice Cannon, transferred to the district of Quebec.

July 6. J. Camille Pouliot, of Fraserville, Quebec, to be a puisne judge of the superior court in and for the province of Quebec assigned to the district of Arthabaska in the room and stead of the Hon. François Siméon Tourigny, transferred to the judicial district of Three Rivers.

July 6. The Hon. Louis Philippe Demers, puisne judge of the superior court of the province of Quebec, to be transferred from the district of St. Francis to the district of Montreal.

July 6. Arthur Globensky, K.C., of Montreal, to be a puisne judge of the superior court in and for the province of Quebec assigned to the judicial district of St. Francis in the room and stead of the Hon. Louis Philippe Demers, transferred to the judicial district of Montreal.

July 6. Robert Alfred Ernest Greenshields, K.C., and Charles Laurendeau, K.C., of Montreal, to be puisne judges of

the superior court in and for the province of Quebec.

October 12. The Hon. Horace Harvey, a puisne judge of the supreme court of Alberta, to be chief justice of the supreme court of Alberta, with the style and title of The Chief Justice of Alberta, in the room and stead of the Hon. Arthur Lewis Sifton, resigned.

- Oct. 12. William Charles Simmons, of Lethbridge, Alberta, to be a puisne judge of the supreme court of Alberta in the room and stead of the Hon. Mr. Justice Harvey, promoted to be chief justice of the said court.
- Oct. 12. Blaise Letellier, K.C., of Beauceville, Quebec, to be a puisne judge of the superior court in and for the province of Quebec in the room and stead of Jean Alfred Gagné. deceased.

Commissioners.

- June 1. James Pitt Mabee, of Ottawa, Chairman of the Railway Commission of Canada, to be Canadian representative in connection with the discussion of an arrangement for the joint control of international traffic rates between the United States and Canada.
- June 1. James W. Robertson, C.M.G., LL.D., of Montreal, the Hon. John W. Armstrong, of North Sydney, N.S., the Rev. George Bryce, D.D., LL.D., F.R.S.C., of Winnipeg, Gaspard De Serres, of Montreal, Gilbert M. Murray, B A., of Toronto, David Forsyth, M.A., of Berlin, Oncario, and James Simpson of Toronto, to be commissioners to inquire into and report upon the needs and present equipment of the Dominion of Canada respecting industrial training and technical education and into the systems and methods of technical instruction obtaining in other countries; the first named to be chairman

of the said commission and Thomas Bengough, of Toronto, to

be secretary and reporter to the said commission.

July 6. Edward Ernest Prince, B.A., F.R.S.C., of Ottawa, Commissioner of Fisheries and International Commissioner, Thomas Horace McGuire, K.C., of Prince Albert, and Euston Sisley, M.D., of Calgary, to be commissioners to investigate and report upon the conditions and requirements of the fisheries of the provinces of Alberta and Saskatchewan, the said Edward Ernest Prince to be Chairman of the said commission.

August 1. Colborne Powell Meredith, of Ottawa, to be a

member of the Ottawa Improvement Commission.

Jan. 2 1911. To be Knight Commander of the Order of St. Michael and St. George: The Hon. Allen Bristol Aylesworth, Imperial K.C., Minister of Justice of the Dominion of Canada, in recog. honours and nition of services in connection with the North Atlantic Coast K.C.M.G. Fisheries Arbitration.

Aug. 16 1910. The dignity of a knighthood of the United Kingdom was conferred upon the following: The Hon. George Knighthood. William Ross, member of the Senate of the Dominion of Canada, (Byron) Edmund Walker, C.V.O., president of the Canadian Bank of Commerce and Henry Newell Bate, Chairman of the

Ottawa Improvement Commission.

June 24 1910. To be Companion of the Order of St. Michael and St. George: John Gunion Rutherford, Veterinary C.M.G. Director General and Live Stock Commissioner, Department of Agriculture of the Dominion of Canada and (Jan. 2 1911) Lieut. Col. Henry Robert Smith, I.S.O., Serjeant-at-Arms of the House of Commons of the Dominion of Canada.

June 24 1910. To be members of the Imperial Service Order: Achilles Frechette, Chief of the Translation Branch, I.S.O. House of Commons of the Dominion of Canada; John Henry McIllrea, Assistant Commissioner, Royal Northwest Mounted Police Force, Dominion of Canada; William John Ptolemy, Deputy Provincial Treasurer of the province of Manitoba.

The following have been awarded the Imperial Service Medal instituted by His late Majesty King Edward VII for the Imperial recognition of long and meritorious service on the part of Medal. members of the civil service not belonging to the administrative

or clerical branches:

Dec. 27 1910. Thomas Frost Blair, foreman carpenter, Truro, I.R. Eugène Boucher, section foreman, Trois Saumons, I.R.; John William Brownell, engineman, Moncton, I.R.; John Henry Burns, yardmaster, Summerside, P.E. I.R; Henry Sterns Coffin, car foreman, Charlottetown, P.E. I.R.; Isaac Deboo, trackmaster, Newcastle, I.R.; Marchall Fournier, tankman, Beaver Brook, I.R.; Denis Giguère, light keeper, Lavaltrie, Quebee; Isaac Gordon, section foreman, Oxford Junction, I.R.; George Thomas Harrop, chargehand, Moncton, I.R.; James Edward Linkletter, brakeman, St. John, I.R.; Bliss Baron Lutz, engineman, Campbellton, I.R.; Joseph Lynch, messenger, Department of Justice, Ottawa; John Thomas McNally, section foreman, Summerside, P.E.I.R.; James Merry, carpenter, Charlottetown, P.E.I.R.; Moses Frederick O'Brien, engineman, Moncton, I.R.; John Casimire Perry, trackman, St. Nicholas, I.R.; Michael Poitras, trackman, Trois Saumons, I.R.; Joseph Raymond, D.—Y.B.

boiler maker, Rivière du Loup, I.R.; George Seaman, trackmaster, Moncton, I.R.; James Allen Shaw, preventive officer, Department of Customs, Nova Scotia; Henry Sutherland, engineman, Charlottetown, P.E.I.R.; John Wilson, letter carrier, London, Ontario.

June 30. Thomas Carr, lock labourer, Cornwall Canal; Walter

William Smith, corporal, Royal Northwest Mounted Police.
Oct. 8. Walter Erwin, light keeper at Port Atkinson, British Columbia; John Grant Peters, light keeper at Low Point, Nova Scotia.

Official appointments.

Archibald William Campbell, to be Deputy Minister of Railways and Canals in the room and stead of Matthew

Joseph Butler, C.M.G., resigned.

June 8. George Joseph Desbarats, B. App. Sc., Memb. Can. Soc. C. E., Deputy Minister of Marine and Fisheries, to be Deputy Minister and Comptroller of the Naval Service of Canada.

Alexander Johnston, of Sydney, Cape Breton, N.S., to be Deputy Minister of Marine and Fisheries in the room and stead of George Joseph Desbarats, appointed Deputy Minister and Comptroller of the Naval Service of Canada.

Rear-Admiral Charles Edmund Kingsmill, of H. M. Royal Navy, to be Director of the Naval Service of Canada from May 5

1910.

Dougal Orme Malcolm, M.A., to be Governor Oct. 28.

General's Secretary.

Nov. 1. Colonel and temporary Major-General W. D. Otter, C.V.O., C. B., to be Inspector General, vice Major-General Sit P. H. N. Lake, whose term of service under the Canadian Government has expired.

Major-General Colin John Mackenzie, C.B., to be Chief of the General Staff vice Major General Otter, appointed Inspector

General.

Note. New Brunswick, Nova Scotia, Ontario and Quebec, the original provinces of the Dominion, were given representation in Parliament as provided in the B. N. A. Act, 1867, s. 37. British Columbia was admitted 20 July, 1871, by an Imperial Order in Council of 16 May in the same year, and Prince Edward Island on 1st July, 1873, by a like order of 26 June in the same year. Chapter 3 of 33 V. provided that on, from and after a day the Queen should by Order in Council admit Rupert's Land and Northwest Territory into the Dominion, there should be formed out of the same a province to be called the province of Manitoba. The admission of Rupert's Land and Northwest Territory was made under an Imperial Order in Council of 23 June, 1870, to date 15 July of the same year. Manitoba was admitted under authority of chapter 3 of 33 V., 1870; but a doubt having arisen, the Imperial Parliament in 1871 passed an Act to make the Camadian Act valid and effectual. The Northwest Territories Representation Act, chapter 24 of 49 V. (assented to June, 1886), gave two members to Assiniboia, one member to Alberta, and one to Saskatchewan.

Act of 1907. The Territories, exclusive of Yukon, were in 1905 erected into the provinces of Alberta and Saskatchewan, and after the census of 1906 a Representation Act was passed which gave Saskatchewan 10 members and Alberta 7 after the next ensuing election, which came off in October, 1908. Saskatchewan (pop. 257,763) comprises the districts of Assiniboia, 34,910, Battleford, 18,622, Humboldt, 23,903, Mackenzie, 25,998, Moose Jaw, 23,156, Prince Albert, 19,782, Qu'Appelle, 30,997, Regina, 29,633, Saltcoats, 22,112, and Saskatcon, 28,643, each with one member. Alberta (pop. 185,412), comprises the districts of Calgary, 25,391, Edmonton, 26,320, Macleod, 25,961, Medicine Hat, 22,323, Red Deer, 32,001, Strathcona, 29,658 and Victoria, 23,758, each with one member.

The unorganized territories are without representation in Parliament.

Note. A census of population and agriculture of the Northwest provinces was taken under date of June 24, 1996, as provided by chapters 5 and 6 of 4 and 5 Edward VII. The electoral districts are as constituted by chapter 60 of 3 Edward VII, except that by an Order in Council of May 15, 1996, part of the electoral district of Selkirk, in the province of Manitoba, was added to the district of Winnipeg so as to conform with the boundaries of the city of Winnipeg as constituted by an Act of the Manitoba Legislature, assented to February 9, 1996; and except that the census districts of Assiniboia West, Mackenzie, Saskatchewan and Saskatchewan have the province of Saskatchewan, and of Alberta, Calgary, Edmonton, Strathcona and Alberta North, in the province of Alberta, are as constituted by the Order in Council aforesaid.

Note. The articles in this and the following table are usually grouped as natural products, as has been done in table xxi under the heads of agricultural, animal, fishery, forest and mineral products, as well as in tables xxvi-xxix. But by some authorities they are grouped with manufactured products, and they have been abstracted here to show the kind

Aggregates by countries— Britain. United States. Other countries. Totals.	55,044,306 33,472,583 8,209,838 96,726,727	27,829,111 6,907,772	42,144,770 11,926,222	39,372,167	51,783,035 46,446,316 13,918,086 12,147,437

and values of articles to be added to manufactures in those several tables, if so classified. If added to the exports of manufactures as given in table xxi, p. 66, or in table xxix, p. 129, the total values would be \$121,287,839 for 1906, \$127,496,446 for 1908, \$121,286,176 for 1909, and \$143,642,353 for 1910. Added to the exports of manufactures to Britain in table xxi the total value for 1910 would be \$58,393,791, to the United States \$61,796,596, and to other countries \$23,451,966; and the total increase in the period from 1906 to 1910 would be over 18 per cent. But of course the chief component value of these exports is that of raw material.

¹ Included loan \$2,311,667 to Northern Railway; not reported after this year.
2 Included loan \$29,880,912 to C. P. Railway; not reported later.
3 Eastern Extension \$1,281,496 now included in I. C. Railway.
4 Incorrect total of \$2,394,000 shown to the North Shore Railway.
5 Decrease of \$1,044,000 by N. B. Government to St. John and Maine Railway.
6 This amount does not include the cost of the Timiskaming and Northern Ontario
Railway (\$10,570,549) as formerly.
7 Includes \$10,000,000 loaned to the G. T. P. Ry. Co.

TABLE CLXII. Analysis of the financial aid given to steam railways up to June 30 1910.

Dominion.	s
Cash subsides	78,410,273 25,576,533 5,160,054 37,785,320
Totals	146,932,180
Provinces.	
Cash subsides	32,787,030 2,750,030 300,000
Totals	35,837,060
Municipalities.	
Cash subsides	12,739,825 2,404,499 2,839,500
Totals	17,983,824

It would be misleading to assume that the above statements represent all that has been done by the Dominion and the several provinces in aid of railway construction. The Dominion, for example, is building the eastern section of the Transcontinental Railway between Moncton and Winnipeg, on which the expenditure up to March 31 1910 was \$71,934,877.

The guarantees are also substantial.

¹ Includes vessels of every nationality to which casualties have happened in Canadiaw waters and Canadian vessels in other waters. ²545 persons were lost by the wreck of the White Star ss. Atlantic in Turns Bay, Nova Scotia. ³ The returns to the Department of Marine and Fisheries give the number of lives lost as 602, which include 562 persons who were drowned in the wreck of the steamship La Bourgonne, 60 miles to the south of Sable Island, and was therefore on the high seas. The vessel was running between New York and Havre.

Note. The returns in some years sometimes cover wrecks and casualties that have occurred in previous years.

TABLE CLXXX. Number and net tonnage of vessels on the registry of shipping, Canada.

 $^{^1\,\}rm Embracing~362$ paddle-wheel steamers with a registered tonnage of 65,453 tons and 2,865 screws teamers with a registered tonnage of 247,453 tons for the year 1909.

Table Clxxxa. Vessels built and registered in Canada, and vessels sold to other countries 1874-1910.

In 1910, 89,802 tons of wire rods were made by the Dominion Iron and Steel Company Ltd., on which \$538,812 bounty was paid.

IRON BLAST FURNACES IN CANADA IN 1910.

Of seventeen completed furnaces, six were in blast in 1910, for varying periods of time. The operating companies, with numbers and capacities of furnaces, were as follows:—

Dominion Iron and Steel Company, Sydney, C.B.: four completed furnaces of 280 tons capacity each per day; two operated throughout 1910, two for 365, one for 112 days, and the fourth for 255 days.

Nova Scotia Steel and Coal Company, Limited, New Glasgow, N.S.: one furnace at Sydney Mines, C.B., of 200 tons capacity; operated 311

days.

Londonderry Iron and Mining Company, Limited, Londonderry, N.S.:

one furnace of 100 tons capacity; idle throughout the year.
